

Abstract: Electronic commerce or ecommerce is a term for any type of business, or commercial transaction, that involves the transfer of information across the Internet. It covers a range of different types of businesses, from consumer based retail sites, through auction or music sites, to business exchanges trading goods and services between corporations.

The main advantage of e-commerce over traditional commerce is the user can browse online shops, compare prices and order merchandise sitting at home on their PC.

To increase the use of e-commerce in developing countries, B2B e-commerce is implemented for improving access to global markets for firms in developing countries. For a developing country advancement in the field of e-commerce is essential. The research strategy shows the importance of e-commerce in developing countries for business applications.

Objective: In this blog, I learnt how to create a complete e-commerce website with HTML, CSS and JAVASCRIPT step by step. In my previous blog post, we created a responsive portfolio website with HTML, CSS and JAVASCRIPT. If you haven't checked it then do so because it contains a lot of golden tricks about CSS.

Introduction:

Ecommerce Website. A website that allows people to buy and sell physical goods, services, and digital products over the internet rather than at a brick - and-mortar location. Through an e-commerce website , a business can process orders, accept payments, manage shipping and logistics, and provide customer service.

Methodology:

- Cart Page
- Responsive Login Page
- Responsive SignUp Page
- Images

Conclusion

E-Commerce refers to all forms of business activities across the internet. This can include E-tailing, B2B, intranets and extranets, online advertising, and simply online presence of any form that are used for some type of communication. E-Commerce has several advantages and disadvantages as indicated in these papers.

E-Commerce applications that started in the early 1970's need to be still developed in terms of security in developing countries like our India advancement in e-commerce is a challenge to compete with the developed countries.
